# **CSE 370– Database Systems**

## **Assignment 2**

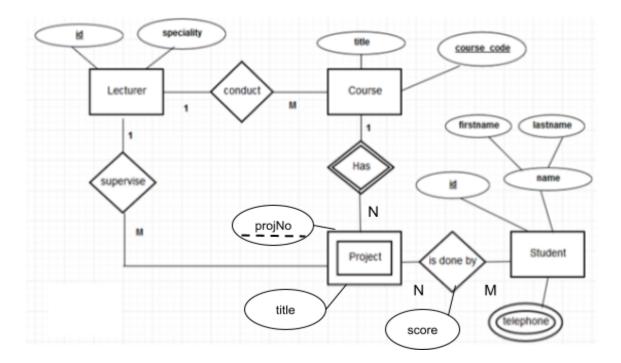

#### **Fall 2024**

#### **Submission Instructions:**

- 1. Write your name, id, section on top of the first page
- 2. Your answer should be handwritten, take pictures and create a single pdf.
- 3. Submit the pdf in the following form: https://forms.gle/EwfufEVe2qst89Pt7
- 4. **Submission Deadline**: 11th December (Wednesday), 2024 11:59 pm (midnight)
- 5. NO LATE SUBMISSION WILL BE ACCEPTED

QUESTION 1 [8 Marks]

Construct a relational schema by mapping the following ER diagram.

### **QUESTION 2**

There are Food Items with the following attributes: ID (unique), Name, Price, Description. The food Items can fall under any of the three categories: Indian Item, Japanese Item and Chinese Item. There are no other categories. Some food items are fusions, so they can fall under multiple

categories. Indian Items have an origin\_state attribute, Japanese items have a calorie count attribute and Chinese Items have Chef's name attribute.

- A. Represent the above scenario using an EER diagram. [2 Points]
- B. There are four options for mapping specialization/generalization. Map the above EER using all four options. If any option is not applicable for the above scenario then explain why. [8 points]

QUESTION 3 [12 Marks]

Construct a relational schema by mapping the following EER diagram. For the specialization/generalization use any applicable option except option 8A (Separate tables for superclass and each subclass).
